EPICS and User stories created:

EPIC1: Auctioning

1)View posts: As a carrier, I want to view all loads posted along with their details, so that I can decide which ones to bid on.

2)Load Post Creation: As a commercial shipper, I want to create a post about my load including its details, so that carriers can bid on it during an auction.

3)Accept Bid: As a commercial shipper, I want to accept one bid out of all bids made by carriers, so that I get matched with the carrier that will deliver my load.

4)View Bids: As a commercial shipper, I want to be able to view all bids made by carriers on my load post, so that I can select and accept one.

5)Make Bid: As a carrier, I want to make a bid on a load, so that I have a chance to be accepted by the shipper to carry the load.

6)Match Confirmation: As a carrier and a shipper, I want to receive a confirmation notifcation once a bid has been accepted so that I can proceed with the freight shipment process.

EPIC2: Payment

1)Release Payment: As a payment gateway, I want to automatically release escrowed payment upon POD sign-off so that the carrier can receive their payment.

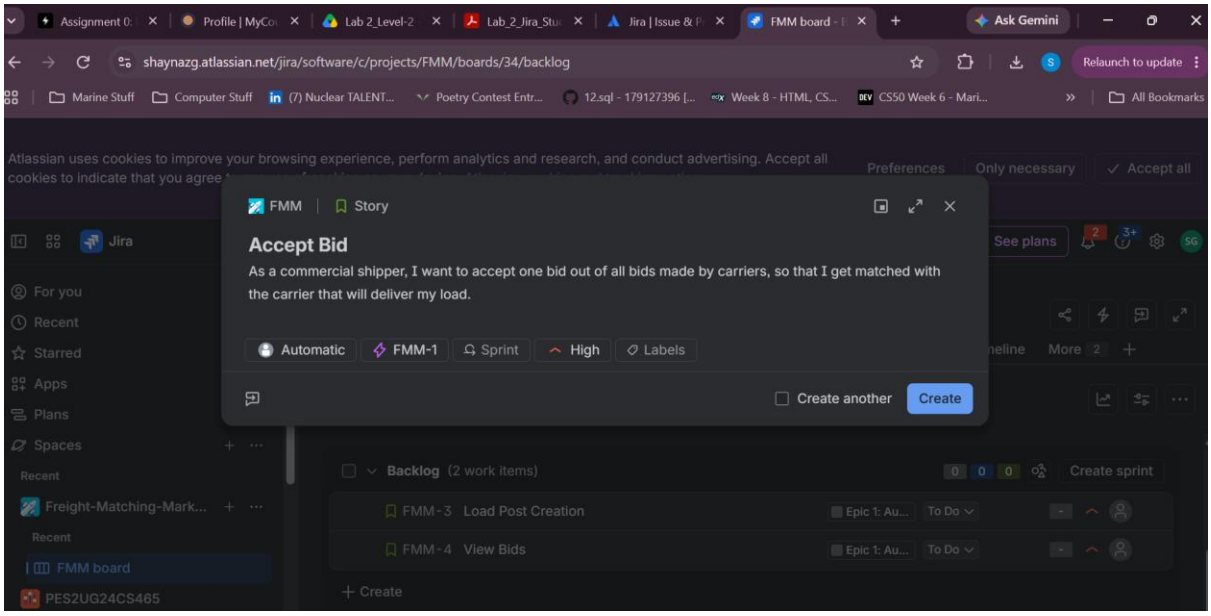

2)Approve POD: As a commercial shipper, I want to verify proof-of-delivery uploaded by the carrier so that escrowed payment can be released.

3)Receipt generation: As a shipper and a carrier, I want to receive the payment receipt within 60 seconds so that I am notified of the completion of the payment process.

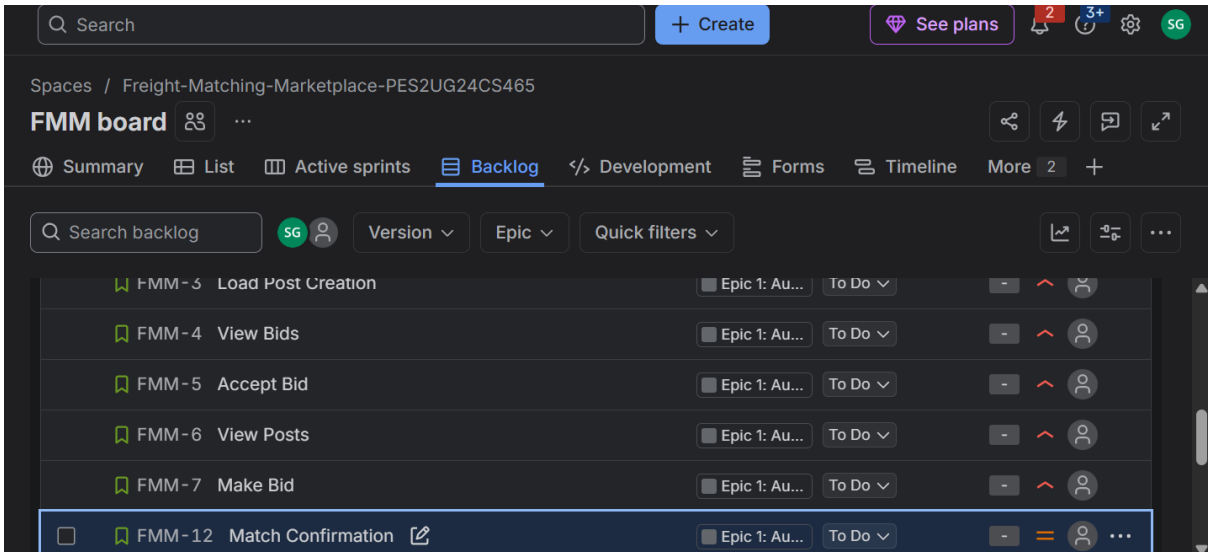

4)Upload POD: As a carrier, I want to upload a proof-of-delivery so that it can be verified by the shipper.

SCREENSHOTS

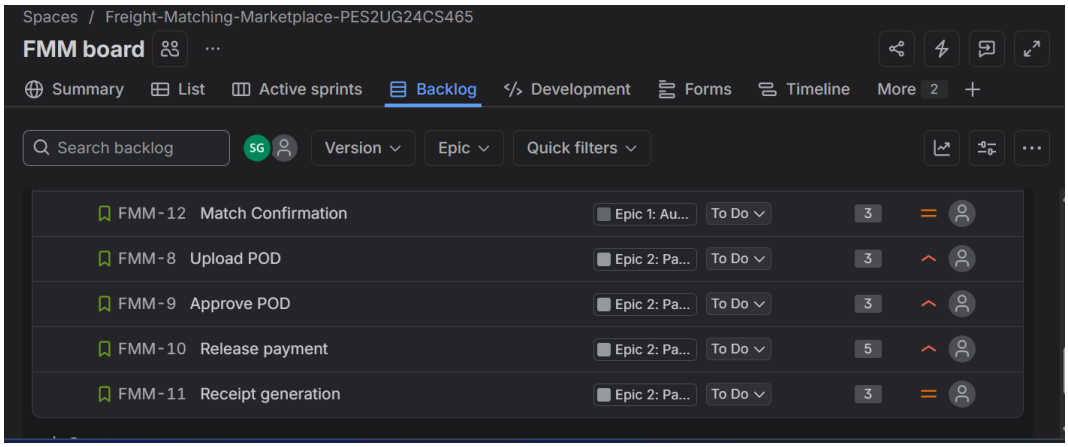

1) Creation of a user story within an EPIC.

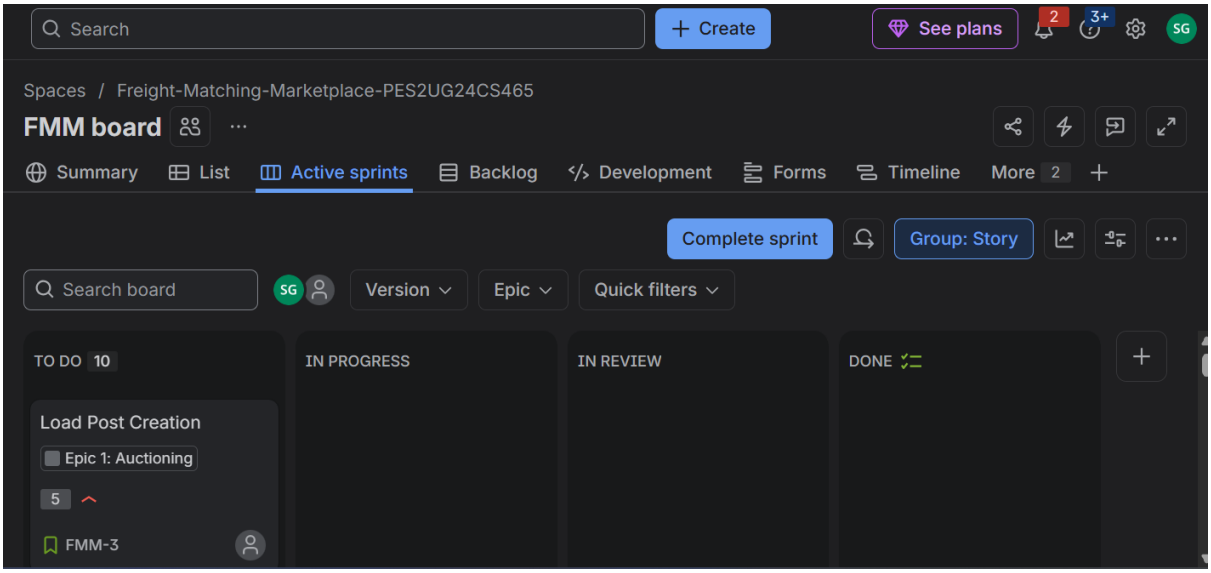

2) Finished creation of all user stories

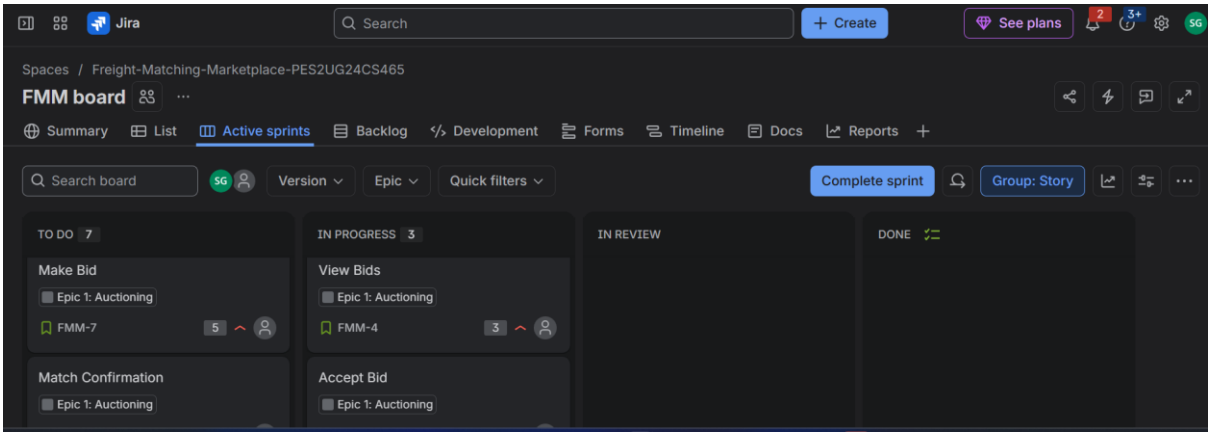

3) Assigning story points to each user story

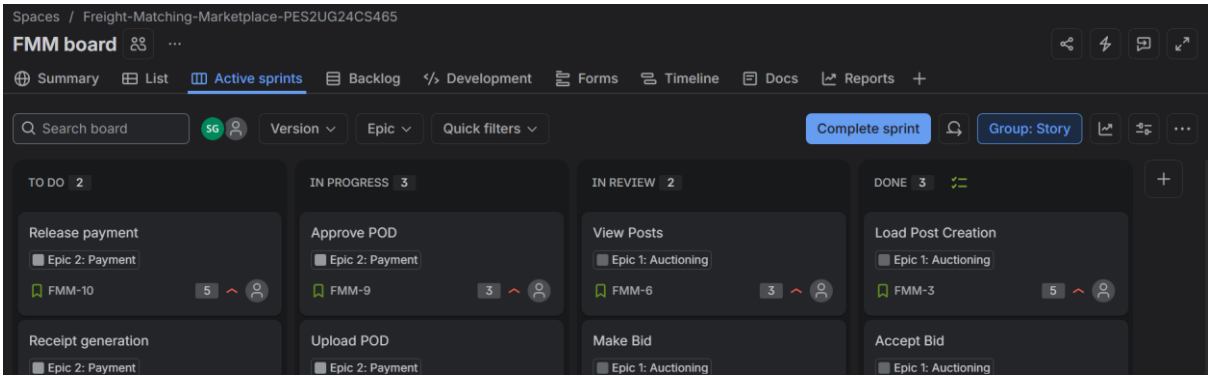

4) Started sprint.

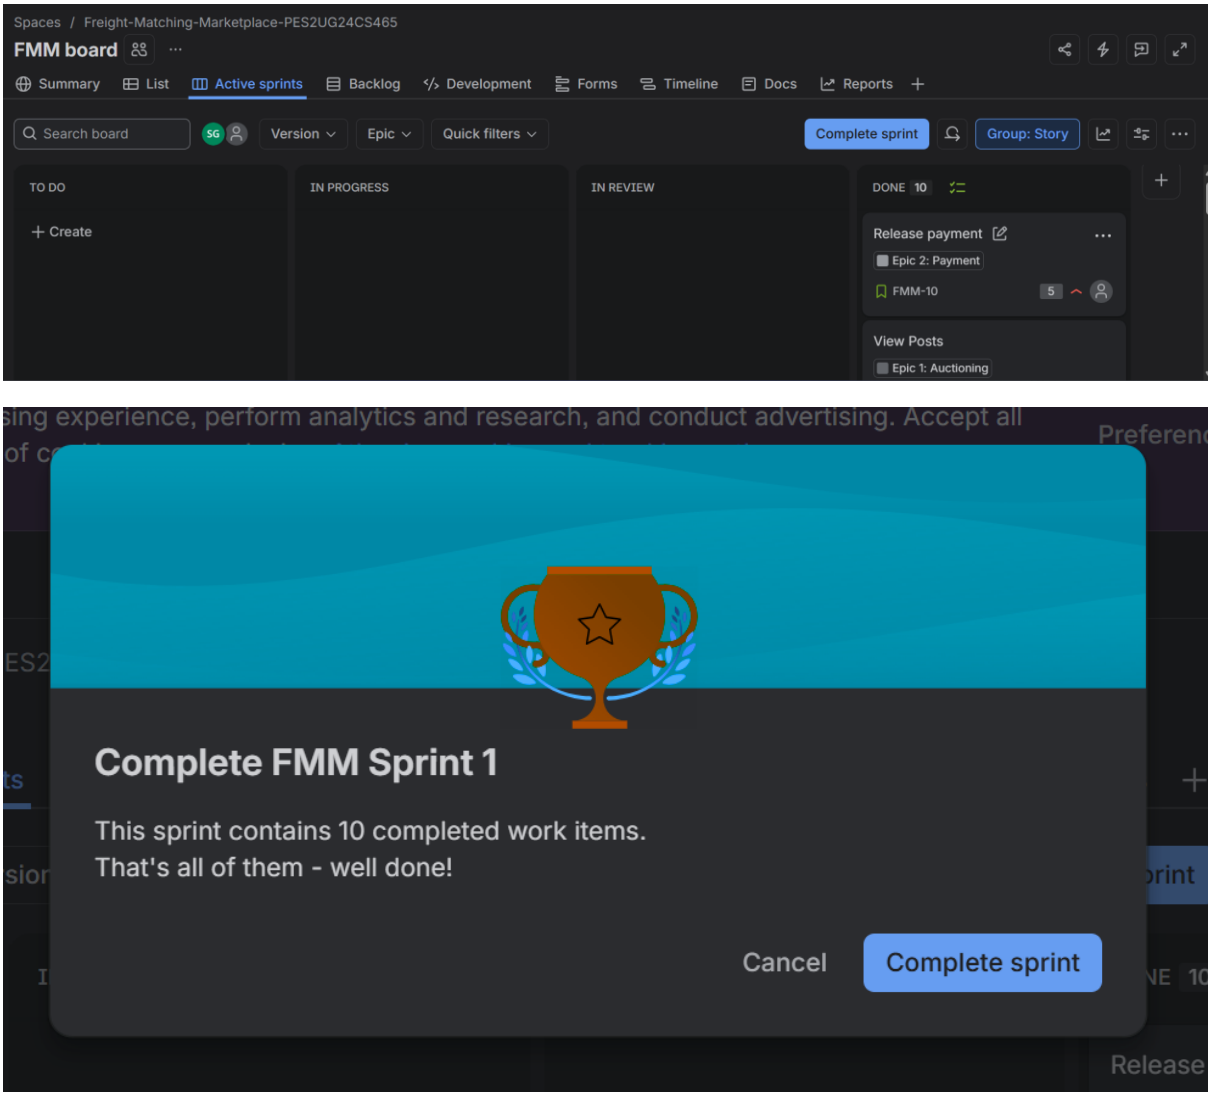

5) Moving a few user stories to in progress.
